

mySmartSimulations, Inc., Announces their Intent to Produce Courses that Teach Basic Operation of Machinery

Saratoga Springs, NY - May 22, 2004 - mySmartSim, a pioneer since 2001 in providing custom interactive simulation and chapter-based courses, announced today their intent to produce courses that teach basic operation of machinery.

mySmartSim has been providing custom interactive simulation and chapter-based courses to the healthcare and law enforcement industries for several years. Today, manufacturing firms are also interested in this new way to cross-train their employees. mySmartSim provides interactive feedback and informative data for the learner and their manager. The possibilities are endless and the cost will not break your budget.

"Interactive simulations can be used for cross-training, as well as for evaluation. Many companies are struggling with lower budgets and the need to increase production. Our simulations are cost effective and can be used for any type of training initiative," said Karen Cornelius, COO, mySmartSimulations, Inc.

About mySmartSimulations, Inc.

mySmartSim has developed an application, Worldwide Interactive Learning Designer (WILD), for creating custom interactive simulation and chapter-based courses. This authoring tool allows them to develop truly interactive learning experiences resulting in reduced liability and training costs, as well as increased retention and productivity. Today they design these courses in one third of the time it took ten years ago. They plan to release this technology to the public in 2006, upon completion of the beta development program. mySmartSim is comprised of industry experts, technologists and trainers.
